| Next | Figma | Jira/Monday | Adobe CC |

Professional Experience

Power3Designs - Principal Frontend Engineer | Full Stack Engineer 2017 - Present

As one of the early founding hires of Power3Designs, I've championed user experience at a strategic level, influencing product direction and driving significant company growth through hands-on leadership and technical expertise. My role extends beyond mere development; it encompasses envisioning and implementing UX/UI initiatives that resonate with users and align with our core business objectives. Key achievements include:

Cross-Functional Team Leadership & Mentorship

- Directed multidisciplinary teams through agile development cycles, instilling a culture of continuous integration and improvement using tools like Jira, Asana, and GitHub.
- Fostered the professional growth of Junior Developers and Designers, mentoring them through complex project lifecycles and empowering them with advanced design and development skills.

Client Collaboration & Technical Consulting

- Partnered closely with clients to elucidate technical requirements and created bespoke system architectures that aligned with their strategic goals.
- Devised and led consultative workshops to define the technical and UX roadmap, providing expert insights that shaped product strategy and user engagement.
- Guided clients through the strategic implementation of AI, ML, and LLM's to address targeted business challenges, thereby driving transformative outcomes and enhancing operational efficiency.

Strategic UX Leadership & Execution

- Orchestrated the UX/UI development lifecycle, ensuring the delivery of solutions that enhance user engagement and streamline navigation.
- Crafted a scalable design framework, standardizing UX processes and documentation across projects, significantly reducing design debt and accelerating product time-to-market.

Product Development & Engineering

- Engineered comprehensive front-end solutions using React and Vue, integrating robust back-end systems to create a cohesive full-stack environment.
- Engineered the development and refinement of MVPs, turning user stories and UX research into products that outperformed market expectations.
- Developed the coding and design of customizable themes and templates, empowering clients with flexible, intuitive platforms.

Innovation & Impact

- Implemented rigorous QA protocols, ensuring cross-platform consistency and optimizing user experience across all devices.
- Initiated and led a transformative overhaul of the existing tech stack, employing Next.js and TypeScript, which enhanced system architecture and reduced operational expenses.

Throughout my career at Power3Designs, my focus has been to infuse a user-centric philosophy into every aspect of our product design and development processes, leading to innovative solutions that not only meet but exceed user expectations and business needs.

Sedera – Senior Software Engineer (Frontend Focused)

2022 – May 2024

- Spearheaded the design, development, and implementation of an advanced claims management system, integrating OCR and AI technologies to streamline case submissions and accelerate claims processing. This innovation resulted in a 40% improvement in processing efficiency, significantly enhancing user experience and operational speed.
 - Proficiently led and guided Junior Developers and Designers in their growth journey.
 - Skillfully devised and executed wireframes, technical, Low-Fi and High-Fi mockups, prototypes, employing Figma, while also establishing a custom tailored design system and design process..
 - Strategically revamped and constructed data modeling architecture saving the company a significant amount in operating expenses.
 - Enhanced the React, Next, Node Tech Stack through comprehensive refactoring, resulting in elevated code performance and enhanced architecture significantly reducing operational expenses.
- 

- UX/UI Development, Analysis and Implementation
- Thoroughly conducted quality assurance tests across all web projects, meticulously identifying and rectifying bugs. Assured precise display across diverse devices including mobiles, tablets, and desktops.

NuevoCloud, INC. – Lead Designer | Frontend Engineer

2017 – 2018

- Led redesign of front-end web application
- Analyzed usage patterns to understand common user workflows.
- Developed UX/UI wireframes and mockups of design concepts
- Worked with dev team to ensure consistent application of new design guidelines.
- Simplified user interface leading to increased user satisfaction and a reduction in user churn.

SignMountain, INC. – Founder | Ecommerce Engineer

2004 – 2017

- Developed an online sign design tool using JavaScript
- Developed, designed and implemented an e-commerce web platform providing customers nationwide an online signage ordering system.
- Created content for all marketing activities to drive hundreds of thousand of visit to the site, including blogging, SEO, and ad design
- UX/UI Development, Analysis and Implementation
- Designed and developed streamlined checkout system including integrated payment and shipping estimates.
- Designed and created a wide range of signs using Photoshop, illustrator SignCAD & SignGO to prepare sign for production.
- Created, designed, and implemented internal back end tools, invoicing, order fulfillment, shipping fulfillment, inventory management and payroll
