About Me

Highly motivated Product Designer and UX Engineer with strong Full Stack development expertise. Excel at conceptualizing and crafting user-centered products that have a transformative impact. Deeply versed in creating responsive and intuitive design systems, employing a keen eye for layout, typography, and color to invoke joy and empowerment. Passionate about overseeing the entire design and development lifecycle, from user research and wireframing to coding, implementation, and evaluation, consistently delivering clean, streamlined, and maintainable code for comprehensive system builds.
